

AN EXTRAORDINARY PARTNERSHIP. EXTRAORDINARY RESULTS.

Take Charge of Your Health in Breast Cancer Awareness Month

When it comes to creating a bright future for women's health, Dr. Warren A. Ellsworth IV and Dr. Candy Arentz form an extraordinary partnership. Dr. Ellsworth is a Board-Certified Plastic Surgeon at Ellsworth Plastic Surgery and excels in breast reconstructive surgery. Dr. Arentz is a fellowship trained Breast Surgical Oncologist. Together, they are a winning combination at Houston Methodist West Hospital for women's health.

Compassionate Care

"When patients come to us, they are diagnosed with cancer, which is often the worst day of their life. We let them know that there is an entire team of specialists behind them to help figure out the best treatment options," explains Dr. Arentz. With a heart of compassion, she and Dr. Ellsworth welcome patients with understanding, warmth, and empathy.

Comprehensive Care

From prevention to early detection to complex treatment and reconstruction, Dr. Arentz and Dr. Ellsworth improve the health and outlook for their patients. Not only do patients have the best cancer care available, they also have cutting-edge reconstruction options.

"The opportunity for reconstruction is offered right away," explains Dr. Ellsworth.

This offers a better cosmetic outcome and reconstruction benefits patients psychologically and socially. If a patient is a candidate for removal of the tumor alone, simultaneous breast lifts and reductions are considered to rebuild the lost portion. When removal of the entire breast is needed, the team rebuilds what cancer has taken in a natural way and restoration of sensation to the breast is attempted, thanks to cutting-edge techniques offered by Dr. Ellsworth. What makes their partnership unique is offering breakthrough options to women close to home. Houston Methodist West Hospital brings cutting-edge clinical trials to the community for both cancer care and reconstruction.

"Sometimes we can even make women look better than before their cancer diagnosis," says Dr. Ellsworth.

Seamless Care

Dr. Ellsworth and Dr. Arentz offer seamless care for patients from start to finish. Their unique partnership benefits patients' care, tailoring options for each woman. They are on the same page, both clinically and academically.

With their years of experience and expertise, patients can rest assured that they are in the best hands. Their offices are conveniently located in the same building, right down the hallway from one another. Their teams stay in constant communication with each other to stay up-to-date on each patient. Personalized plans are created for each patient, tailored to their exact needs and desires.

"We make women feel whole again," explains Dr. Arentz.
